

PUSHPLATE

Push plates
for flush cisterns

MADE IN ITALY

valsir[®]
QUALITY FOR PLUMBING

Push plates:
style is also reflected
by details

In Valsir we are convinced that the technical excellence of the flush cisterns must be matched by the right aesthetic completion of the push plates, the only visible part of the cistern installed in the bathroom.

The bathroom is now a part of the house that is dedicated to body care and personal wellbeing. That is the reason why Valsir's range not only includes products for installation in chases or ducts but also furnishing elements, of equal importance because in the bathroom no detail should be overlooked.

Numerous materials and finishes are employed that offer interesting combinations such as steel and wood, glass, stone and precious resins.

The actuation possibilities are equally varied:
mechanical, pneumatic and electronic actuation.

The combinations that are created allow solutions to be obtained that fit in with all decors, thus meeting the most demanding requirements both of an aesthetic and design nature of clients, architects and interior designers.

MADE IN ITALY

DESIGN PLATES WHEN DETAILS MAKE THE DIFFERENCE

The Valsir Design line of push plates is part of the Valsir project destined for the showroom distribution channel with 35 customizable models in over 270 different combinations.

The Valsir Design plates are created with innovative and refined materials that allow all bathrooms to be personalized with a touch of elegance.

The buttons on the plates incorporate a pneumatic activation; they are silent, precise and soft.

Characteristics

- **Dual flush** plates.
- Elegant and clean **design**.
- **Soft** actuation, **silence** and **precision**.
- High **quality materials**.
- Activation by remote control.

New buttons for Design plates

The Valsir range of buttons has been enriched with two new finishes.

All of the Design plates can be personalized with the new black and white ABS buttons to satisfy all requirements.

BLACK AND WHITE, TECHNOLOGY AT THE SERVICE OF AESTHETICS

Made with **innovative materials such as acrylic and anodized aluminium.**

Available in the **medium size (215x145 mm).**

KIT FOR PERSONALISED PLATES: MINIMALIST AND ELEGANT

The range of Valsir Design push plates is completed by a kit for personalised plates in order to create a perfect match between the activation mechanism of the plate and the bathroom tiles.

The frame is **available in medium** (215x145 mm) and **large** (245x165 mm) with the possibility of a polished or satin finish to be coordinated with square or round control buttons.

The kit is composed of a **frame with a thickness of just 14 mm** inside which a bathroom tile can be inserted or any other material if so desired: ceramic, marble, resin or wood, thus offering maximum personalisation and a perfect match with the bathroom.

FEEL, PLATE FLUSH TO THE WALL

Once a purely functional object, the push plate became an aesthetic element inside the bathroom.

Along with design, technology improves Valsir offer: the aesthetic appeal combines the wide choice of push plates fulfilling any client's need, even for wall flush push plates.

Valsir developed a system that allows a quick placement of the push plate inside the wall. Installation is simple, job is flawless and the result is perfect!

The frame is **available in medium** (215x145 mm) with the possibility of a polished or satin finish to be coordinated with square or round control buttons.

INFRAROSSA, THE ELECTRONIC PUSH PLATE

Dual - 245x165 mm
Finishing: polished chrome

Eye - 245x165 mm
Finishing: polished chrome

Remote - 245x165 mm
Finishing: polished chrome

Inox - 215x145 mm
Finishing: satin stainless

Range of electronic flushing devices for the WC: a guarantee of hygiene and maximum functionality

The Infrarossa electronic push plate is ideal in public and commercial locations, such as hospitals, airports and shopping centres and in bathrooms for people with disabilities: they also incorporate a vandal-proof system to guarantee maximum safety and inaccessibility.

By means of the plates in the Infrarossa range, the flushing system is activated automatically, ensuring hygiene and functionality in all situations. The Infrarossa plates provide an automatic flush every 24 hours. In this way, cleansing of the pan is guaranteed and total hygiene is ensured.

Dimensions: 245x165 mm.

Infrarossa Dual

Electronic plate with two activation possibilities:

- proximity flush at a distance of 10 to 75 cm from the plate;
- possibility of mechanical activation.

Infrarossa Eye and Inox

Electronic plate with one activation possibility: proximity flush at a distance of 10 to 75 cm from the plate.

Infrarossa Remote

Electronic plate with two activation possibilities:

- activation by a remote button, positioned on the lateral grab rail;
- mechanical control on the plate (in the event of a power failure).

Infrarossa Blink

Blick, a new flushing device for the urinal, a high performing infrared system to be used with the Valsir Infrarossa Eye plate!

THE NATURAL COMPLETION FOR A VALSIR CISTERN

Valsir matches its flush cisterns with a series of push plates with a meticulous and clean style in various finishes using classic materials such as ABS and metal.

Valsir push plates meet the criteria of maximum functionality and take on an important role in terms of aesthetics expressed by the position of the WC in the bathroom.

PNEUMATIC CONTROLS

The Valsir range of in-wall or external cisterns is complemented by a complete series of pneumatically operated flush buttons.

The buttons, both dual and single flush, are available both for wall and floor applications and can be installed at a distance as far as 2.5 m from the flush cistern and, thanks to reduced force activation, they can be used in playschools, nursing homes and hospitals.

SECURITY, TAMPER RESISTANT PUSH BUTTON

The Valsir cistern control systems stand out for their ease of installation and regulation, always guaranteeing system accessibility.

The Security button, created to meet the requirements of **installations in thick walls**, was designed according to a concept of total **safety and inalterability**, which makes it the ideal solution for **vandal and tamper resistant applications**.

- Servicing guaranteed thanks to **total system accessibility**.
- **Easy to install** and to adjust.
- The installation requires a hole of just 42 mm in diameter.
- **Installation in thick walls** (max. 400 mm).
- **Vandal resistant** system.
- Ideal in clinics and prisons.

CARE PLATES

The activation plates with facilitated activation further enhance the flexibility of the range of pneumatically operated buttons.

The buttons were designed to facilitate activation in bathrooms for disabled people in that actuation requires a reduced force and the **buttons protrude to facilitate activation.**

Versions are also available for the partially sighted with chromatic differences for the full and partial flush to increase visibility of the activation buttons.

CUSTOMER SERVICE

Technical support

Valsir provides complete support during design and on site, thanks to a high-level technical department that consists of a team of engineers with international experience that are capable of providing solutions to all installation needs.

Valsir Academy

Valsir has an important training facility - **Valsir Academy** - dedicated to clients, distributors, plumbers and planners that provides perfectly equipped courses, both theoretical and practical on the use and the design of plumbing and heating systems. Courses are provided both inside the training facility and on customers' premises.

SOFTWARE

Silvestro software

The design of floor and radiator heating systems, water supply as well as waste and drainage systems, is extremely easy and the issue of the technical documents is rapid when using the Silvestro software program. Rapid, simple, unique, Silvestro has numerous strong points:

- rapid learning curve thanks to a simple and intuitive interface
- completely graphic background that facilitates input of the project details
- automatic drawing of the loops in the floor radiant systems
- automatic repositioning of the stack points on the plan view
- generation of calculation reports that are exportable in an .xls format
- import and export of files in .dwg format
- immediate update of software with a guided procedure
- creation of complete bill of materials from the project files

Valsir is BIM ready

Valsir has embraced the BIM philosophy, the modelling process that allows the improvement of planning, design, construction and the management of buildings, concurring with the transition of the industry toward the digital representation of buildings. “BIM oriented” planning offers extraordinary competitive advantages: greater efficiency and productivity, fewer errors, less downtime, lower costs, enhanced interoperability, maximum sharing of information, a more punctual and coherent supervision of the project. Valsir captures the essence of this system creating a series of Revit applications and models designed for simple and fast use.

QUALITY AND ENVIRONMENT

Quality

The ongoing commitment of Valsir to the creation of high quality products is demonstrated by over **200 product approvals** obtained around the world from the most strict certification bodies (figure updated on 01/06/2019), by the Quality Management System that is certified in compliance with **UNI EN ISO 9001:2008** and the Energy Management System that is certified in compliance with International Standard **UNI EN ISO 50001:2011**. Valsir S.p.A. has further demonstrated its commitment to the environment obtaining the **ISO 14001:2015** certificate to the productive site in Vestone.

Sustainability

Efficient processes and reliable products are no longer the only parameters used to perform an assessment of the quality of a company's conduct: the capacity of the company and its management to design and implement production process that are sustainable from an environmental point of view is of equal importance.

Valsir has started a project of Corporate Social Responsibility and has published its 2nd Sustainability Report that gathers facts and figures relating to the daily commitment of Valsir in terms of social, economic and environmental responsibility.
